

Swedish fiber optic end-face electric cleaning pen wall-mounted

AI Overview

A Swedish wall-mounted fiber optic cleaning pen, such as the IBC Click Pen, efficiently cleans fiber optic end faces in SC/FC/ST/LC connectors while dissipating static and preventing contamination. Overview Fiber optic end-face cleaning is critical for maintaining optimal signal performance and preventing damage in RF-over-Fiber and telecommunications systems. Swedish suppliers, like Swedish Microwave (SMW), offer the IBC Fiber Connector Cleaning Tool, also known as a "Click Pen," designed for deep Q-ODCS connectors and other standard fiber connectors. These pens are suitable for wall-mounted or stationary setups, allowing technicians to clean connectors efficiently without handling loose solvents. Features Connector Compatibility: Works with SC, FC, ST, and LC connectors, including 1.25mm and 2.5mm ferrules. Cleaning Mechanism: Single-click or push-to-clean action ensures consistent cleaning and prevents overuse. Static Dissipation: Precision cleaning pens, like the Fiberwash MX, dissipate static charge to avoid attracting airborne dust. Solvent Safety: Nonflammable, fast-drying, and plastic-safe solvents are used, making them safe for repeated use. Portability and Mounting: While many pens are handheld, wall-mounted holders or stations can be used to store and dispense pens for convenient access in labs or telecom rooms. Cleaning Capacity: Many pens provide up to 800+ cleans, reducing the need for frequent replacements. Usage Instructions Remove the guide cap from the pen. Insert the pen tip into the connector adapter or wall-mounted holder. Push the outer shell or click mechanism to start cleaning. A click indicates completion. Repeat as needed for multiple connectors. Where to Buy Swedish Suppliers: SMW.se offers the IBC Click Pen and can provide quotes for wall-mounted setups. International Retailers: Amazon and AliExp...
