

The Source of the Three-Way Bridge

Overview

Three Way Bridge The first bridge over the chasm at the top of the High Falls was constructed in 1835 and 1836 by Cap. According to records, the bridge looked like "a devil on two sticks". A multi-way bridge is a bridge with three or more distinct and separate spans, where one end of each span meets at a common point near the centre of the bridge. According to an 1854 report of the State Engineer and Surveyor on the Canals of the State of New York, work on the bridge was put under contract during that year as part of.
