

Transfer 90-degree bend in the cable tray

Overview

Here's how to create a seamless rolling 90-degree bend in cable tray! ☐☐ This guide walks you through each step, from marking and cutting to forming and joining. First, marking is important☐☐. The space between your lines will be determined by the tray size. Since the jaws of the bolt cutter drags a layer of zinc across the cut end and forms a protective layer. For example, use 100mm gaps for 100mm. Cablofil Wiremesh Cable Tray concept based upon performance, safety and economy; three qualities which make Cablofil Wiremesh Cable Tray system preferred by installers. Cablofil adapts to the most complex configurations, and its structure gives maximum strength for minimum weight. but the length of the part in the centre is the concern as i have seen different. Depends on the type of cable tray, you can buy 90° tray fittings or use a speed square with a straight edge and a grinder or skill saw to cut 45° cuts.
