

What is the price of aluminum optical fiber cable

AI Overview

Aluminum optical fiber cables typically range from \$0.09 to \$6 per foot depending on fiber type, strand count, and construction, with armored or specialized cables costing more.

Price Ranges

- Single-mode fiber (OS2): \$0.09 to \$1.52 per foot for standard cables; higher-quality glass or pre-terminated assemblies may increase costs.
- Multimode fiber (OM3/OM4): \$1.50 to \$6.00 per foot, reflecting wider cores and higher manufacturing complexity.
- Armored or aluminum-sheathed cables: \$0.50 to \$6.50 per foot, depending on protection level, burial suitability, and environmental rating.

Bulk wholesale purchases: Prices can be lower, ranging from \$0.09 to \$1.52 per foot for single-mode cables, with volume discounts available for large orders.

Factors Affecting Pricing

- Fiber Count:** Higher strand counts increase cost proportionally. For example, a 12-strand cable may cost around \$0.50 per foot, while a 24-strand cable can reach \$1.00 per foot.
- Cable Construction:** Indoor riser-rated cables are cheaper than plenum-rated or armored cables. Aluminum sheathing adds durability for outdoor or direct burial applications.
- Material Quality:** Premium glass fibers (e.g., Corning) cost more than generic glass or plastic optical fibers, offering lower attenuation and longer lifespan.
- Pre-Terminated Assemblies:** Factory-terminated cables with connectors are 20–30% more expensive but reduce on-site labor costs significantly.
- Installation Complexity:** Outdoor runs, trenching, splicing, and conduit installation increase total project costs. Typical installation rates range from \$0.60 to \$3.00 per foot depending on terrain and labor.

Purchasing Options

Aluminum fiber optic cables are available from suppliers like Alibaba, offering customizable options for strand count, armored or tactical designs, and bulk orders. Direct manufacturer purchases often provide volume discounts and allow specificati...
