

What is the size of the network cabinet mainline

Overview

Almost all networking cabinets follow the EIA-310 standard, which specifies a 19-inch internal mounting width. This universal standard ensures that equipment from any manufacturer will fit properly in your cabinet. Think of it like a specialized bookshelf, but instead of books, it holds servers, switches, routers, and other networking gear. This research covers the global server and network cabinet market, focusing on. Rack height is measured in rack units (U) — $1U = 1.75$ inches (44.45 mm) to allow space for cable management and airflow. The commonly used rack rackmount network cabinet sizes are as follows: 600mm: relatively common, suitable for installation of general scale network equipment, can meet the installation needs of most standard 19 inch devices, and has a compact space utilization.
