

What wireless router should I use for a 30m fiber optic connection

Overview

Our top overall pick is the Netgear Nighthawk RS700S, a Wi-Fi 7 router built for multi-gig fiber plans that handles up to 200 devices across 3,500 square feet. For budget-conscious households, the TP-Link Archer AX55 delivers reliable Wi-Fi 6 performance without the premium price. A fiber-optic connection is the best choice for fast home internet as it has a number of advantages compared to traditional copper cables, such as faster speeds and less interference. Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. However, you need a router capable of supporting multi-gig speeds to get fiber internet connectivity. Therefore, to help you choose the best routers for fiber internet, the guide below consists of the top options for fiber internet. Popular internet service providers (ISPs) such as Cox, Spectrum, Xfinity, and fiber-optic providers like AT&T offer faster Internet speeds for expansive home WiFi networks. Owning your router, modem router combo, or mesh WiFi system can help you take full advantage of your Internet plan and even.
